

# Behavior-Based Safety Service

## Build a Behavior-Based Safety Program to Reduce Workplace Incidents, Claims, and Costs!

- ✓ Focus your employees on the behaviors that ensure quality and safety with written Job Hazard Analyses (JHAs) and Safety Observations.
- ✓ Promote a proactive safety culture of awareness, training, and injury prevention.
- ✓ Assist with OSHA and VPPA program compliance.
- ✓ Realize improved results that impact the bottom line.

## How the Behavior-Based Safety Service works

- ✓ We review job tasks and identify critical safety behaviors to create JHAs.
- ✓ We then train your staff to perform Safety Observations using the JHA application in the Risk Management Center for an effective program.
